# Stop/Slow Paddle

## **Standard Stop/Slow Handle**

Our standard stop/slow handle is designed for durability and ease of use. Heavy duty ABS plastic tube and socket connectors with locking spring buttons make deployment and take-down a snap. Handles feature flat surfaces front and back which aid the user in determining the sign's orientation, minimizing the amount of time their attention is away from traffic. A thick rounded bottom cap protects the handle from wear while making the unit easy to rotate.

Handles come standard with our roll-up stop/slow kits and are also available for use with our rigid paddles.

## **Telescopic Stop/Slow Handle**

Our new telescopic extension handles are tough and durable, made of the same heavy duty ABS plastic as our standard handles. Telescoping from the storage configuration to 5' and 6' in length, these handles provide display heights of 6' and 7' from the bottom of the sign to the ground (paddles have 1' handle attached). Plastic tube and socket connectors with locking spring buttons make deployment and take-down a snap. Handles feature flat surfaces front and back which aid the user in determining the sign's orientation, minimizing the amount of time their attention is away from traffic. A thick rounded bottom cap protects the handle from wear while making the unit easy to rotate.

Telescopic handles are included in selected roll-up stop/slow kits and may be used with any of our rigid paddles.
